Learn about our
logistics services

Customs Agency

We offer our customs logistics solution for foreign trade operations providing permanent legal advice.

Advantages

Coordinate with a single entity reducing the administrative burden.

Safety and traceability in your operation.

Technical and legal advice.

Container repair

Services of conditioning and repair of shipping containers, which includes inspection, as well as upgrades for food grades, maquila, among others.

Advantages

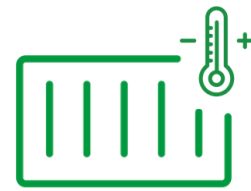

Large stock of spare parts

Maintenance and repair of dry and refrigerated containers, Gensets, Powerpacks, inspections and pre-shipments (PTI)

Experienced personnel

For refrigerated containers, we have all parts and spare parts for refrigeration units.

Container handling equipment in good condition and sufficient quantity.

Temporary Storage

We offer a temporary storage service which includes unloading and loading piece goods and rolling load of exclusive containers, consolidated by DP World and APM Terminals in Callao and TPE in Paita.

Advantages

Cargo storage under temporary or simple storage.

Carrying out cargo services such as labeling, packaging, strapping, consolidation and deconsolidation of containers.

Facilities and provision of resources for customs operations.

Load control and security.

Empty container storage

Reception, inspection and dispatch of empty containers for foreign trade.

Advantages

+670 k m2 for empty and full container warehouses at the regional level.

+10 stacker cranes and 7 scales.

Specialized washing area.

We are the strategic partners of the world's leading shipping lines.

24/7 technical support.

Storage

We adapt to each economic sector. We serve, offering from warehouses in transit to storage of cargo in stock; also specialized cargo storage such as grains, hazardous and frozen materials with value-added services.

Advantages

Operations tailored to the needs of our customers.

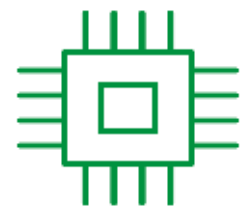

Operation indicators and others that the client may require.

Aligned to current legal regulations.

We develop communication interfaces.

World class WMS.

Conditioned infrastructure according to type of merchandise.

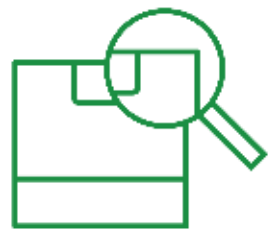

Add value services

We offer value-added services as an integral solution for the entire supply chain which includes cross docking, order preparation, specialized maquila and among others.

Advantages

Personal trained in the handling and transformation of products.

Recovery and re-packaging of products.

Labeling, combo assembly, heat sealing, among other services.

Local and international transportation

We offer the transportation of goods in the following modalities: Temperature controlled, regular and oversized cargo, and hazardous cargo.

Advantages

Extensive experience in moving all types of cargo.

Security (integrated GPS monitoring).

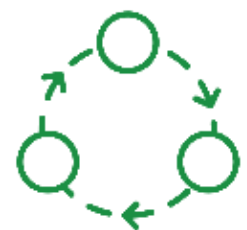

Primary, secondary and consolidated transportation.

National and international coverage.

Experience in working with community transportation companies.

Integration and consolidation of services.

Distribution

We offer the transfer of merchandise from our own distribution center or a third party to its final destination, providing your operations with efficiency, safety and effectiveness.

Advantages

Proven experience.

Availability for large operations and immediate reaction.

Nationwide coverage.

Reduction of logistics costs by integrating operations.

Certified delivery and home delivery.

Last Mile

We solve your delivery needs, transporting your products to the final consumer's door with the highest technology, speed and reliability.

Advantages

Immediacy in delivery.

Large coverage.

Real Time Tracking.

Route optimization.

Real time casualties.

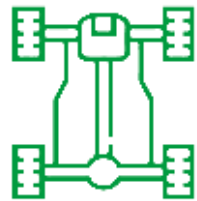

Real time confirmations.

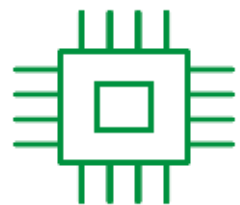

Equipment rental

We provide efficient and reliable solutions to all our customers, by renting high quality equipment together with a highly specialized technical service, in order to guarantee the highest profitability in their operations.

Advantages

More than 4000 chassis.

550 electric generators.

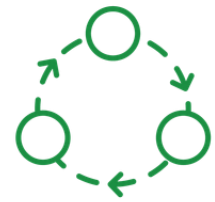

7 powerpacks for refrigerated containers.
